Philips DVP5980S_12

Work on this firmware was started by **tech25** and then by **MTZ**
They add to this custom mod:

1. Autoload subtitles
2. For avi files "GoTo: h:mm:ss". When play avi files press "Title" 2 times and enter H:MM:SS to jump to moment you want.
3. 4 Fonts for subtitles (Standard, Small and Large).
4. New position for subtitle.

What I add...

- New skins
- **RISC from 5990_12 (only v5 - RISC 5990)**
- **8 lines in filebrowser**
- New filebrowser with scrollbars, outline font (**48 char.** from USB, and from CD/DVD limit to "yellow band" - intelligent file cutter, max. 64 char.)
- Jpeg preview in background
- New icons for files.
- DivX Subtitle in "General Page".
- Option to change colors for subtitles (text, outline or background). For "Dark Grey" option for background, this is "semi-transparent".
- 16 level for vertical position of subtitles.
- "Load Original Subtitles, if not find load all" with menu.
- WordWrap and Reformat (if subtitles line is long, automatic make wrap)

- OSD font with outline, better contrast for all OSD message.
- DVD Quick play (with menu - on or off). If on, when play DVD's, skip menu and play directly movie.
- Volume +/- on "Repeat keys". Volume level is stored.
- All mpeg4 menu are in "General Page". You can make change when movie play.
- Slideshow transition is set to very fast.
- **Full UnicodToCP** (ISO + Joliet and USB). ([only v5 - RISC 5990](#))
- **Partial remove UOP** ([User operation prohibition](#)) ([only v5 - RISC 5990](#))

Some user reports that with version with RISC from 5990 "**HDMI not working one day after update**".
I can't confirm or infirm this, because I don't have this player...

Very important! Before upgrade **SET OSD LANGUAGE TO ENGLISH**.

Thank you for your hard work.

it's true. HDMI not working one day after update. any chance you could fix it?
